

Edvance Software System

We are committed to advancing the art of education by producing and developing user-friendly software programs that allow teachers to spend less time managing information and more time with their students.

Strengths

Development – Our software is designed and created by educators for educators.

Customization – Our developer license allows for collaborative adaptations of our system to meet the needs of individual schools.

Pricing – Our annual license is based on school enrollment and number of modules needed.

Service – Our service is exceptional. Daily support and initial training are a part of every license.

ADVANCING THE ART OF EDUCATION

Our Company

Founded in Montreal by a team of educators, Edvance Software Inc. supports best practices in education by empowering schools through the use of technology. Our web-based school management software is designed to facilitate innovation by offering student-centric solutions.

Our products are shaped by the continuous feedback of our users resulting in software applications that are visionary and highly efficient yet extremely simple to use. Inquire about how we have empowered some of our clients by tailoring our software to meet their specific needs and goals.

Features and Benefits

Fully Online One Time Data Entry

Teachers can enter and then submit marks anytime using any computer or web-enabled handheld device.

Real Time Tracking

Electronic reporting of absences, lates and behaviour facilitates immediate follow-up.

Admissions and Enrollment

The application, enrollment and payment processes can be done completely online.

Easy Scheduling

In house scheduling offers internal control of teacher workloads throughout the year and eliminates the cost of outsourcing.

Student/Parent and Teacher Portals

Parents can access report cards, preview Gradebook results and manage their profiles. Students can communicate with their teachers and share files within the context of a curriculum.

Competency Tracking and Reporting

Course specific and cross-curricular competencies can be easily implemented and evaluated.

Curriculum Management and IEPs

Thousands of specific curriculum objectives can be processed and then assigned to individual students or groups of students as needed. Teachers can later evaluate without re-entering data.
